Attention: Mr. Steven Chang, P.E.

Subject: Notification of Liner Installation at the Waimanalo Gulch Sanitary Landfill,
Kapolei, HI

Dear Mr. Chang:

Pursuant to Part II - Special Conditions, Section B, Provision #8 of the Waimanalo Gulch Sanitary Landfill (WGSL) solid waste permit (number LF-0182-09), this letter serves as the 5-day notification to the State of Hawaii Department of Health that Waste Management of Hawaii has scheduled geosynthetic liner installation for a portion of Cell E-5, followed by a portion of Cell E-6 (to include the E-6 sump), to begin on July 19, 2010 at the WGSL, Kapolei, Hawaii.

GSE Lining Technology, Inc. is the geosynthetics manufacturer and installer for this project and AECOM Technical Services, Inc. (ATS) is the Construction Quality Assurance (CQA) Engineer. This effort will involve installing and documenting the installation of approximately 84,000 square feet (ft²) of geosynthetic materials for the liner installation work on a portion of Cell E-5, and approximately 57,000 ft² for the liner installation work on a portion of Cell E-6 (to include the E-6 sump). All liner geosynthetics will be installed with CQA oversight by a qualified technician having a minimum of 5 years of appropriate experience, under the supervision of an ATS professional engineer.

If you have any questions or need more information about this project please call me at (808) 356-5321.

Sincerely yours,

Ronald E. Boyle, P.E.
Project Manager
AECOM Technical Services, Inc.
